

NUVOLA BATH

The relaxing bath with hydrotub and chromotherapy

Nuvola is an innovative method of floating buoyancy that allows a complete relax and well-being of your body and mind which improves the sleep quality.

The system permits a full immersion of the body without any contact with water during the process.

Water circulates even above the body which will feel not only suspended but also wrapped around with water.

This way the same temperature is widespread in every part of the body reconciling the psychophysical relaxation and preparing the skin to a faster and efficient absorption the active ingredients of a potential applied pack.

The active ingredients of each “product” applied on the skin through packs or wrapping that penetrate deeply and faster thanks to the synergy of three essential elements:

- Water pressure in each part of the body allows a delicate occlusion equally distributed.
- Water temperature facilitates the skin pores opening process.
- Complete psychophysical relaxation that helps the full absorption of the active ingredients.

An hour of sleep in the relaxing “Nuvola bath” can be compared to 8 hours of sleep on a normal bed. Its use for a few minutes during the day can improve the sleep quality.
